

Team Name: Irrational Grunting (IGRU)

Team Number: 103-5

Team Members:

- Jason Hill
- Etash Kalra
- Sean Masucci
- Kellan Gerken
- Ethan Olander

Completed Features

- Home Page with Login/Signup Buttons and Upcoming Event Cards
 - HTML Layout Created
 - Basic JavaScript Implementation of Login/Signup requirement checklist
- Calendar view page
 - HTML Layout Created
- My Saved Event cards page
 - HTML Layout Created
- Search Events Page
 - HTML Layout Created

Working Features in Demo

- Each of the completed features listed above opened and presented as working HTML pages as expected.
- HTML pages are currently filled with dummy data, as our SQL database is in progress.

Issues Faced During Development/Demo

- The demo went very well, and close to expected. The only demo issue we had was that all of our pages weren't necessarily connected through the main navigation bar.
However, we see this as a small fix/improvement for the next iterations of development.

Suggestions Offered by TA (Jack Kawell)

- Add a feature that allows the user to take the saved events and export it to their google calendar.
- For the web service it was suggested to use Amazon Web Services.
