

**Team Name:** Irrational Grunting (IGRU)

**Team Number:** 103-5

**Team Members:**

- Jason Hill
- Etash Kalra
- Sean Masucci
- Kellan Gerken
- Ethan Olander

**Test for adding events to database**

- Create a new event then add it to the sql database for all users to see.
- Check to see if the event shows up on the web page

**Test for login/sign up feature**

- Create a user using the signup module then see if the user is then saved in the sql database.
- Then see if the user can login and if they have signed up then they should be saved in the database.

**Test for events saved to calendar feature**

- When the user is logged in make sure if they have saved events the events are saved with the user and visible on the calendar.
- When a user clicks on the save event button make sure the event is saved in the database and added to the users calendar.
